More than 500 million smallholder farmers produce roughly a third of the world's food supply and in low- and middle-income countries, they produce a bit more than half of the calories consumed. Owning small plots of land where they can typically only harvest one or two crops, smallholders can lack the resources needed to support their families and communities. These farmers face unique challenges that require tailored solutions. At Bayer, we want to empower more than a 100 million smallholder farmers in developing countries around the world by providing more access to agricultural solutions that are sustainable.
