We conducted a firm wide agricultural portfolio review in which we engaged with our palm oil clients in business segments beyond growers to understand the total uptake of RSPO among processors and traders and develop ways to enhance our approach across the supply chain. During the process we have encouraged our processor and trader clients to join the RSPO in the few cases that they were not yet members.

It is a normal part of our review and due diligence process of our palm oil and palm oil related clients to promote the adoption of RSPO certification and membership when not specifically required by our policy.

4. Actions for Next Reporting Period

4.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

Citi will continue to enhance our approach to promote CSPO uptake with clients throughout the palm oil supply chain. We will engage our higher risk RSPO member clients and support them in better aligning their environmental and social management systems with the RSPO principles and criteria when gaps become evident during our annual and transaction based environmental and social risk review process. We will also continue to engage all potential new clients at onboarding who are not RSPO members to take steps to become RSPO certified as a condition to providing financial services.

Citi will be focused on enhancing our approach to forced labor in the palm oil sector through enhanced engagements and forced labor oriented questionnaires.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility indicators will be done through several channels, including ACOP. As the implementation of Shared Responsibility reporting is still on-going and in development, the Shared Responsibility section in ACOP is not yet final and may change in future ACOP cycles.
