Cosmosol promote the use of certified sustainable palm oil and its goal is to achieve 100% of RSPO raw materials by 2025.

Some of the key obstacles we have faced in sourcing sustainable palm oil include:

1. resistance from some suppliers due to higher costs (timewise and financially);
 2. complexity and traceability of supply chains;
 3. difficulty for suppliers to separate and provide RSPO palm oil for some clients and conventional for others;
 4. difficulty to work on an ingredient that often forms a minor part of the end product;
 5. and lack of clarity and knowledge of the palm oil derivatives entering our supply chain, making it difficult to transition these to RSPO certified material.

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility indicators will be done through several channels, including ACOP. As the implementation of Shared Responsibility reporting is still on-going and in development, the Shared Responsibility section in ACOP is not yet final and may change in future ACOP cycles. RSPO COMMITMENT

SOURCING of SUSTAINABLE PALM OIL:

ACHIEVE 100% BY 2025

While certification is an important starting point, we recognise there is more we can and must do. Cosmosol was motivated to support the sustainable palm oil industry due to the impact of palm oil production on the environment and workers in the supply chain, as well as demand from consumers for more sustainable products and ingredients. Cosmosol actively works to create a market for sustainable palm oil by implementing sustainable sourcing practices that create positive environmental and social impact, which aligns with our mission.

Our main achievement is that we sourced in 2020 the 95.82% (+9.05% from 2019) of Roundtable on Sustainable Palm Oil (RSPO) raw materials via a Mass Balance model.

Some of the key obstacles we have faced in sourcing sustainable palm oil include:

5. and lack of clarity and knowledge of the palm oil derivatives entering our supply chain, making it difficult to transition these to RSPO certified material.

We are currently still negotiating with our suppliers to switch to 100% Segregated or Mass Balance RSPO certified sustainable palm oil.

We aim to attain 100% sourcing of RSPO certified sustainable palm oil by the end of 2025.

If we will need to buy credits from RSPO in subsequent years, we will consider buying Independent Smallholder credits.
