ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

DL.2.0 In order to facilitate ease of reporting and transparency, RSPO members operating within the palm oil demand supply chain can now choose to report palm oil and palm oil product volumes on:

an aggregate level (as in previous ACOP reporting cycles)

2.2 Total volume of uncertified and certified palm oil, palm kernel oil and related products purchased for use in your company's own-brand and third-party brand products

Description	Tonnes
Total volume of crude palm oil (tonnes)	4947.0

Total volume of palm kernel expeller (tonnes)	0.0
Total volume of crude palm oil/palm kernel oil-based derivatives and fractions (tonnes)	0.0
Total	5432

2.2.1 Please estimate the percentage of derivatives and fractions (reported in Question RT.2.2) derived from palm oil or from palm kernel oil. The default split for volumes is assumed to be 80% palm oil-based derivatives and 20% palm kernel oil-based derivatives.

2.3 Please estimate the regional distribution of your company's uncertified and certified palm oil, palm kernel oil and related products sales (as declared in Question 2.2) in the following countries/regions. targets met

3.3 Which year did your company begin (or expects to begin) using 100% RSPO-certified sustainable palm oil and palm oil products from physical supply chain options (Identity Preserved, Segregated and/or Mass Balance) in own-brand products.

2020

3.3.1 If the previous target year has not been met, please explain why.

we have several smaller suppliers (that are using less than a ton palmoil/year) that are unable (due to cost or knowledge) or unwilling to change. Despite regular exchange and enormous progress we have not yet been able to make all our suppliers switch. We keep working on this during 2021. We are however considering installing a cut off percentage below which we will work with credits to ensure a reasonable ROI. Some of our suppliers are using very small quantities of palmoil (eg 50kg/year) and a physical supply chain is a big hurdle to take for them.

3.4 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why

They cover all our subsidiaries/countries we sell in.

4. Trademark Use

4.1 Does your company use or plan to use the RSPO Trademark in own-brand products?

Yes

4.2 Please select the countries where your company uses or intends to use the Trademark

5. Actions for Next Reporting Period

5.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

Our own manufacturing unit (VLEVICO) (cheese, salads, meatdishes,...) has been certified. We will continue with our suppliers that still do not use physical chains to switch to physical RSPO supply chains: SEG for food and MB for non food. Yearly we send out an e mail to all our suppliers that use palmoil as an ingredient (we talk about several hundreds of products) to check if they use RSPO palmoil. We check their auditing proofs and if there is a problem we work with them to swithc to RSPO palmoil. We continue to work with our suppliers to decrease the use of certificates.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility indicators will be done through several channels, including ACOP. As the implementation of Shared Responsibility reporting is still on-going and in development, the Shared Responsibility section in ACOP is not yet final and may change in future ACOP cycles. For more information on Shared Responsibility, please go to <https://rspo.org/news-and-events/news/what-are-the-new-shared-responsibility-rules> or email the ACOP team at acop@rspo.org
