5. Actions for Next Reporting Period

5.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

We are gradually implementing the replacement of non-RSPO certified raw materials with sustainable alternatives for the "old" formulations, while all the new products have been already formulated with RSPO-certified raw materials since 2017.

Our objective is achieving by 2025 100% RSPO certified raw materials in the new products we formulate and manufacture (then, "pure" contract manufacturing is excluded).

For what concerns the RSPO certification for our products, instead, we are assessing the opportunity to get one or more manufacturing plants of the Group certified in the future, but we have not planned so far to achieve it - in the end, this choice is up to our customers (i.e. the brand owners).
