Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1.1 In which markets does your company sell goods with palm oil and oil palm products?

Europe, North America, Africa, Latin America, Rest of the World

DL.2.0 In order to facilitate ease of reporting and transparency, RSPO members operating within the palm oil demand supply chain can now choose to report palm oil and palm oil product volumes on:

an aggregate level (as in previous ACOP reporting cycles)

Palm kernel oil-based derivatives and fractions	1.0

2.3 Please estimate the regional distribution of your company's uncertified and certified palm oil, palm kernel oil and related products sales (as declared in Question 2.2) in the following countries/regions. In cases where sales distribution data is not available, members may use manufacturing regions as a proxy for regional usage of certified volumes.

11.12%

This may include your usage of RSPO Credits to cover gaps in certified uptake, changes due to business environment, variations due to stock positions or efforts to support independent smallholders beyond volume commitments.

Our effort is to use RSPO sustainable oils in manufactured products and to guide our customers towards this choice. Of course this is not always feasible due to high cost effect. Our company is currently developing a sustainability plan for the next 5 years, in order to increase the volumes of certified raw materials and reduce environmental impact from production activities. An external advising company has taken over this project and solutions as usage of RSPO credits or support of independent smallholders are on the table. 3. TimeBound Plan

3.1 Which year did your company achieve (or expects to achieve) the RSPO supply chain certification?

2015

3.2 Which year did your company begin (or expects to begin) using RSPO-certified sustainable palm oil and palm oil products in own-brand products

2017

3.2.1 If the previous target year has not been met, please explain why.

It is very difficult to use exclusively RSPO certified oils, as this would significantly affect the costs of our products. So, we are currently using RSPO-certified oils only in a part of our total productions.

3.3 Which year did your company begin (or expects to begin) using 100% RSPO-certified sustainable palm oil and palm oil products from any supply chain option in own-brand products.

2030

3.3.1 If the previous target year has not been met, please explain why.

If the prices of certified oils will remain in so higher levels in comparison to non-certified oils, it will be extremely difficult to achieve this target in 100%. Many of our products won't be price competitive.

3.4 Which year did your company begin (or expects to begin) using 100% RSPO-certified sustainable palm oil and palm oil products from physical supply chain options (Identity Preserved, Segregated and/or Mass Balance) in own-brand products.

2030

3.4.1 If the previous target year has not been met, please explain why.

If the prices of certified oils will remain in so higher levels in comparison to non-certified oils, it will be extremely difficult to achieve this target in 100%. Many of our products won't be price competitive.

3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why

We are an EU-based manufacturer and we mainly target in EU market.

3.6 Does your company use RSPO-certified sustainable palm oil and palm oil products in products manufactured on behalf of other companies?Yes

3.6.1 Does your company have a TimeBound Plan to only use RSPO-certified sustainable palm oil and palm oil products in the goods you manufacture on behalf of other companies?No

3.6.3 Please explain why your company does not have such a TimeBound Plan

The use of certified oils in products that we manufacture on behalf of other customers is linked with the customers' demands and their cost margins. The demands for certified oils from our customers are constantly increasing. But, only a few of them actually proceed to certified oils, when they calculate and compare the cost effect. Small customers cannot afford certified oils.

Belgium ,Cyprus ,France ,Germany ,Greece ,Italy ,Netherlands ,Poland ,United States

Our corporate sustainability strategy has become essential for remaining competitive. So, we will do our best to promote RSPO program. Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility indicators will be done through several channels, including ACOP. As the implementation of Shared Responsibility reporting is still on-going and in development, the Shared Responsibility section in ACOP is not yet final and may change in future ACOP cycles. For more information on Shared Responsibility, please go to <https://rspo.org/news-and-events/news/what-are-the-new-shared-responsibility-rules> or email the ACOP team at acop@rspo.org
