## 5. Actions for Next Reporting Period

### 5.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

In 2021, we made a strategic decision to convert the remainder of our US and Canada PKO volumes to mass balance sustainable. This went into effect as of March 1, 2021. We have also found that palm oil is contained as a component or derivative in many of our raw materials (like sprinkles, ganache, emulsifiers, etc.). As of February 1, 2021 - we've established a policy for the US and Canada that all new raw materials must contain mass-balance certified sustainable oil as well. This will allow us to ensure new components and derivatives are sourced sustainably as we move forward. We are in the process of evaluating strategies to bring our global markets to 100% certified oils over time.

## Shared Responsibility

*The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility indicators will be done through several channels, including ACOP. As the implementation of Shared Responsibility reporting is still on-going and in development, the Shared Responsibility section in ACOP is not yet final and may change in future ACOP cycles. For more information on Shared Responsibility, please go to <https://rspo.org/news-and-events/news/what-are-the-new-shared-responsibility-rules> or email the ACOP team at [acop@rspo.org](mailto:acop@rspo.org)*
