## 5. Actions for Next Reporting Period

### 5.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

In November 2020, Tyson Foods' released a Forest Protection Standard focused on reducing deforestation risk in our global supply chain of four commodities – cattle and beef; soy; palm oil; and pulp, paper and packaging.

We partnered with Proforest to conduct a deforestation risk assessment in 2020. The assessment concluded that nearly 94 percent of the company's land footprint is at no to low risk of being associated with deforestation. To proactively address the remaining six percent that was found to be at risk, the Forest Protection Standard was developed to ensure the company is continuing to target the reduction of deforestation risk throughout the global supply chain.

To support the Forest Protection Standard, specific Commodity Action Plans are being developed to outline the work required in each commodity area to support deforestation free sourcing.

## Shared Responsibility

*The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility indicators will be done through several channels, including ACOP. As the implementation of Shared Responsibility reporting is still on-going and in development, the Shared Responsibility section in ACOP is not yet final and may change in future ACOP cycles.
