5. Challenges

5.1 What significant obstacles or challenges has your group encountered in the promotion of certified sustainable palm oil (CSPO) or certified FFB? What efforts has your group taken to address these obstacles or challenges?

- [x] Awareness of RSPO in the market
- [x] Difficulties in the certification process
- [ ] Certification of smallholders
- [x] Competition with non-RSPO members
- [x] Funding/Financial resources
- [x] High costs in achieving or adhering to certification
- [x] Human rights issues
- [x] Insufficient demand for RSPO-certified palm oil
- [ ] Lack of access to training on Certification requirements
- [x] Reputation of palm oil in the market
- [ ] Reputation of RSPO in the market
- [ ] No challenges faced
- [x] Others

Others

Other Challenges:
- Lack of ISH sale volumes/uptake data trend (in general)
- Delay of payment for credit sales through Palmtrace
- Buyers tend to offer below market price, or at least MB price because they do not see the value in credits. They perceived credits as valuing less than MB.

Effort taken:
- Market: WAGS is using an integrated approach to combine the support for sustainable production by independent small producers and increasing the market uptake for sustainable production through the alignment of business partners.
- Cost: Implementing regional group certification to reduce audit cost
- Delay in payment: We have reached out to RSPO, and have been informed that after payment is not received after 3 months the transaction will be cancelled. This is helpful as we can then release the volumes back on PalmTrace, or offer to other partners.
- Lack of perceived value: We will communicate more on public platforms such as website and social media on how ISH credits have benefited smallholders and raise the profile of credits as crucial for smallholder inclusivity.

5.2 What positive impact has your group observed in the production of certified CSPO or FFB through your group's membership of the RSPO?

- [x] Awareness of environmental issues
- [x] Awareness of human rights issues
- [ ] Federal or state government support
- [ ] Increased demand for palm oil
- [x] Increased income through trading of credits
- [ ] No impact observed
- [x] Others

Others

Gain additional knowledge and skills through the implementation of Wild Asia BIO programme

5.3 In addition to the actions already reported in this ACOP report, what other ways has your group supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- [x] Engagement with business partners or consumers on the use of CSPO
- [ ] Engagement with government agencies
- [ ] Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- [x] Promotion of physical CSPO
- [ ] Providing funding or support for CSPO development efforts
- [ ] Research & Development support
- [ ] Stakeholder engagement
- [ ] No actions taken
- [x] Others

Others

Promotion of best management practices and encouraging the implementation of more natural and chemical-free methods through WAGS BIO-Intensive programme which results in reduction of chemicals, usage of organic waste, improve soil biodiversity and soil health, increase yield and reduction of operation cost.

This is also an interest to corporate buyers who are looking for initiatives beyond certification, to support real on-the-ground solutions among independent smallholders. This would encourage them to support independent small producers more, reducing the perception that small producers are 'the problem', but in reality, are 'the solution'.

Wild Asia's approach is to work with independent dealers and collection centres who are not aware of RSPO and bringing them into the certification process. We see them as an important link to reach independent small producers. We are also one of the few working directly with independent small growers (above 50 ha) and certifying them under a group scheme which reduces the cost of certification, adding value to them. We also work with independent mills, providing solutions for their external suppliers to get certified.

Wild Asia also works together with government agencies such as MPOB and JAKOA (Department of Orang Asli Affairs) to support smallholders under their networks to get RSPO-certified.

5.4 If your group has any other publicly-available reports or information regarding its palm oil-related policies and activities, please provide the links here
