4. TimeBound Plan

4.1 Which year did your company achieve (or plans to achieve) its first RSPO P&C certification?

2011

4.2 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all its estates and mills?

2011

4.2.1 If the previous target year for G.4.2 has not been met, please explain why

the target was achieved.

4.3 Which year did your company achieve (or plans to achieve) 100% RSPO certification of scheme smallholders?

2014

4.3.1 If the previous target year for G.4.3 has not been met, please explain why

In 2014 Agropalma Group has achieved RSPO certification to all its FFB suppliers. However, after run a LUCA analysis (in 2015), Agropalma found that one of its current schemed suppliers had liabilities, according the rules of RSPO Remediation and Compensation Procedures. So, farmer was suspended from RSPO Certification. Together with the supplier company has been running a Remediation and Compensation process within RSPO, since 2015. In 2019, RSPO has approved the proposal for compensation and this supplier was re-included in the certified supply base. Other important issue is the fact that few new FFB farmers are becoming part of Agropalma supply base. They start as independent suppliers and if they perform well in terms of production, labor and environmental management, they will be able to be integrated as schemed suppliers. Everytime this happens, these farmers will require a certain time to prepare themselves and obtain RSPO certification. In 2019 two of these suppliers were included in the RSPO audit and got the certification status. Therefore, in 2019 all schemed suppliers in achieved certification. However, due the dynamic nature of Agropalma supply base (we are always seeking to engage with new suppliers), it is not possible to establish a fix deadline. 2014 was registered just because the ACOP system requires.

4.4 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all FFB, regardless of source?

2014

4.4.1 If the previous target year for G.4.4 has not been met, please explain why

as per explanation provided in item G.4.3.1.

Others

7.2 Why is your company not currently supporting independent smallholders?

We understand it is better focus our resources in supporting our scheme family farmers to assure they perform well, according the RSPO standards. Beyond that, Agropalma is always open to engage with new FFB suppliers, since they understand and formally agree to comply with RSPO P&C and Brazilian Laws, demonstrate implementation on the ground and have a voluntary will to become schemed with Agropalma, agreeing with our high sustainability standards. In such cases, we would provide full support.

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on [https://rspo.org/members/shared-responsibility](https://rspo.org/members/shared-responsibility) or email the Shared Responsibility team at sharedresponsibility@rspo.org.

- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of RSPO-certified palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

The main obstacles are placed in demand side of the supply chain. As most of Agropalma clients are placed in Brazil, where the demand for Sustainable Palm Products is still low (but increasing). International clients (especially Europeans) are more interested and already buy significant amounts of certified products from Agropalma. A special challenge refers to multinational companies that delay to apply their global sourcing policies related to RSPO in Brazil.

To increase demand in internal market Agropalma always promote RSPO and explain the issues and concerns related with sustainability of palm oil production worldwide to consumer companies in Brazil.

Other important challenge is the fact that some RSPO members claim that they are certified and offer certified palm products in the market, while they are really not certified. This situation confuse market operators and undermine the credibility of RSPO Certification and RSPO Organization.

In 2020 and again in 2021 Agropalma reported such a case to the RSPO secretariat, unfortunately the situation has not changed.
1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Research & Development support
- Stakeholder engagement

☐ No actions taken
