## Challenges and Support

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

Using CSP(K)O requires additional costs to be incorporated in relatively cheap and basic product of soap bar. Encouraging customers to join and share premiums is difficult and is a real obstacle in increasing the number of products produced based on CSP(K)O. On one hand - there is still not enough awareness of the importance of RSPO among some markets/customers, on the other hand - palm oil has bad press and clients are skeptical about RSPO. Therefore there are difficulties to convince some business customers to use CSP(K)O in the products and cover extra costs.

### 1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
