4. TimeBound Plan

4.1 Which year did your company achieve (or plans to achieve) its first RSPO P&C certification?

2018

4.2 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all its estates and mills?

2018

4.2.1 If the previous target year for G.4.2 has not been met, please explain why

The target was reached, all our management units are RSPO certified since 2018

4.4 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all FFB, regardless of source?

2025

4.4.1 If the previous target year for G.4.4 has not been met, please explain why

Based on the fact that our third party suppliers are independent producers, we are relying on the Jurisdictional Certification in Ecuador. At the moment, Ecuador has already signed a commitment for Jurisdictional Certification, and Danec Group is part of this.

Progress in the jurisdictional certification process has been slow because the national government is leading the project. This year the current government resumed the project and Grupo Danec continued to support the initiative. At the same time, as a Danec group, we have launched a pilot project with a group of our smallholders to lead them in the implementation of good agricultural practices and as a second step to RSPO certification.

5. Concession Map

5.1 The RSPO General Assembly Resolution 6G (2013) calls for all members with Grower operations to submit maps of their concessions through ACOP. Has your company submitted concession maps to the RSPO in previous ACOP cycles?

No _____

6. GHG Footprint

6.1 What is the average GHG footprint for all certified management units by hectare (tCO₂e/ha)?

1.60

6.2 What is the average GHG footprint for all certified management units per tonne of crude palm oil (tCO₂e/tCPO)?

0.73

6.3 What are the key emission sources identified by your company in certified management units?

- Land use change
- Existing cultivation peatland
- Palm oil mill effluent (POME)
- Fertiliser application
- Others

Others

-

6.4 Does your company have a baseline for GHG reporting?

No

6.4.3 Please explain why your company does not have an existing baseline, and if it is planning to develop a baseline for GHG reporting?

As one of the main sources of GHG emissions is Land Use Change, this data is calculated from the emissions when the crop was planted, we haven't developed any new plantings, just replantings, there is no action determined to reduce this values that are calculated from historic operations.

7. Support for Oil Palm Smallholders

7.1 How is your company supporting Independent Smallholder groups?

- Sourcing of physical FFB
- Financial support
- Operations support
- Training support

The support is given in the locations where we have operations

8. Actions For Next Reporting Period

8.1 Outline activities that your company will undertake in the coming year to advance its certification efforts.

Based on the fact that our third party suppliers are independent producers, we are relying on the Jurisdictional Certification in Ecuador. At the moment, Ecuador has already signed a commitment for Jurisdictional Certification, and Danec Group is part of this.

Progress in the jurisdictional certification process has been slow because the national government is leading the project. Total	152962.00

2.3 Volume of RSPO-certified palm oil, palm kernel oil and related products sourced in the year (tonnes):

0.00%

2.4.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake calculated in PT.2.4. This may include changes due to business environment, evolving nature of operations or variations due to stock positions

During our first year of certification, the refinery bought all CSPO and CSPKO produced in our operations, but this stock is not sold yet, so, we decided that the physical stock will not be bought by the refinery, and we can sell as credits from the mills and crushers.

3.3 Which year did your company achieve (or expects to achieve) 100% RSPO certification of all palm product processing facilities.

2018

3.3.1 If the previous target year has not been met, please explain why.

The target was reached in all our own operations

3.4 Year expected to only source RSPO-certified palm oil and oil palm products.

2025

3.4.1 If target has not been met, please explain why.

It is difficult to reach the sale of 100% PO certified because there is a big difference in the world market regarding the price from Indonesia and Malaysia. The difference is around \$150. Also the costumers still do not pay more for the PO certified. There are few clients demanding PO certified, so, it will be complicated to reach this target as expected.

3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why

It covers all countries where we have operations (Ecuador)

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile.
