2025

4.2.1 If the previous target year for G.4.2 has not been met, please explain why

RSPO is a certification which requires a great amount of resources (social and economic). We are adapting our processes and resources to the new P&C 2018 in order to achieve them. Also because of PC, a palm disease, that has established in the north area of Ecuador, which also has changed plans, many palm oil plants died and the market has changed faster. That has required priority attention and strategies to respond to market changes. Furthermore, in 2020 we experience a pandemic, COVID-19, which change every plan established, times and cronograms, after having a very inestable year regarding business, health and social activities, we hope get on time again.

2028

4.4.1 If the previous target year for G.4.4 has not been met, please explain why

RSPO is a certification which requires resources (social and economic). In Ecuador there are many smallholders, therefore in order to achieve 100% RSPO Certification for all FFB, regardless the source, the Jurisdictional Certification should be done in our country, which is a program between RSPO and Ecuador's Government, that started a few years ago, but it is still ongoing, taking into consideration the health pandemic the whole world is going through, the time bound plan established will suffer changes in the execution of actions and established times.

In early March 2020, we start to gather more information about GHG footprint, but plans changed, and it's in stand by, we will start recovering information again. Even thought our key emission sources identified will be POME.

6.4 Does your company have a baseline for GHG reporting?
