As we only buy raw materials that have certified palm incorporated in them, we always work with certified palm. Regarding the palm oil that we receive to incorporate in a special product that are cookies, this one comes with info that it is certified, but the trader does not have a certification, only the producer has, so, regarding all the definitions of being able to consider it certified, we cannot consider it certified. So, palm oil (fat) comes from a certified producer. The trader delivers it to panike, but he is not certified. Panike receives it and is certified. the chain of custody is broken due to the lack of certification of the trader and so we do not consider it certified.
