#### 4. Trademark Use

##### 4.1 Does your company use or plan to use the RSPO Trademark in own-brand products?

No

## Shared Responsibility

*The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. ## Challenges and Support

### 1.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

#### Others

High costs in achieving or adhering to certification - Cost of RSPO certified palm oil is linked to market supply and demand so Reckitt's ability to influence market pricing is limited. Nevertheless, we are collaborating with the wider industry to promote greater uptake of RSPO certified palm oil across the industry, which should result in increased supply overtime.

Traceability - 90% of the palm oil sourced are derivatives and come from highly complex global supply chains. Achieving traceability to plantation for our derivative supply chain continues to be a challenge; however, we are engaging our derivatives suppliers over the course of 2022 to explore what actions can be taken to increase traceability, i.e. supply chain simplification, etc.

Low usage of palm - We are relatively small user of palm oil with over 90% of the palm oil sourced in the form of derivatives. Consequently, given the complex nature of our supply chain, our leverage to drive change is limited. Consequently, we are driving much of our activities through sectoral approaches such as through the Consumer Goods Forum Human Rights and Forest Positive coalitions.

Human Rights issues - Having a scalable way to assess human right issues at every mill and plantation throughout our palm oil supply chain is a challenge. We are driving much of our activities through sectoral approaches such as through the Consumer Goods Forum Human Rights and Forest Positive coalitions. Additionally we will be piloting new approaches in 2022 to improve human rights management system within our palm oil supply chain.

**1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?**

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
- Others

## Others

Industry collaboration – We are active members of the Consumer Goods Forum’s Forest Positive and Human Rights Coalitions of Action to remove deforestation and forced labour from our collective supply chains. As part of this we are engaging key palm oil suppliers to develop and deploy a human rights due diligence system from refinery to plantation.
