### 1. Operational Profile

#### 1.1 What are the main activities of your organisation?

We are committed to finding and formulating solutions related to maintaining and managing Indonesian's natural resources in more sustainable ways while also meeting socio-economic needs of smallholders, regional and indigenous communities. By using a jurisdictional approach, our works are to support more sustainable commodities production and supply chain in two provinces in Indonesia, namely Central Kalimantan and West Papua.

Inobu works and helps the government to develop well-targeted policies, plans and regulations, financed by their own budgets, to support sustainable and inclusive development at the regional scale. We also support the recognition and protection of the rights of indigenous communities and support them to improve their current farming systems in a way that protects their environment while improving their welfare.

Furthermore, Inobu empowers local farmers to demand for good governance, especially the improved delivery of the services to rural communities as well as the recognition and protection of their basic rights. Inobu also helps the farmers to have access to better technical information, inputs, training and finance to increase their agricultural productivity and farm profitability.

The Kotawaringin Barat jurisdictional certification working group consists of 4 sub-working groups while the Seruyan working group consists of 3 sub-working groups. Each sub-working group has its own work focus covering efforts to reduce deforestation, protect high conservation value areas and high carbon stock areas, prevent conflict, and empower farmers, indigenous peoples and local communities.
