The use of CSP(K)O requires additional costs to be incorporated into the relatively cheap and basic product of soap bars. Encouraging customers to join and share the premiums is difficult and a real obstacle to increasing the number of products made with CSP(K)O. On the one hand, some markets/customers are not yet sufficiently aware of the importance of the RSPO, and on the other hand, palm oil has a bad press and customers are sceptical about the RSPO. As a result, it is difficult to convince some business customers to use CSP(K)O in their products and to cover the extra costs.

1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims

- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
