We will continue to offer and supply RSPO certified products based on customer demand. Our customers want more customization with respect to traceability for their specific supply chain and despite the complexity, we continue to work to find ways to improve tracking and reporting at origin.

Our Sustainable Palm Oil policy is rooted in the Principles and Criteria of the Roundtable on Sustainable Palm Oil (RSPO) and we believe they serve as the primary global sustainability standards for palm products and encourage all end-users of palm oil and palm oil products in the mature markets.

We also promote the use of RSPO certified materials to our existing customers whom are either sourcing conventional materials to move to RSPO certified products in order to meet our Shared Responsibility target.

We had conducted awareness building session with customers regarding RSPO certification in bid to help them to be more aware of RSPO. We also promoting the uptake of Independent Smallholder CSPO with our customer.

We participate in NASPON and are members of the Holistic Program along with RSPO, which is an initiative to promote RSPO certification among smallholders and mills in México. Also, since NA will be 100% RSPO certified across our facilities by the end of 2023 in the coming year we will be promoting more actively the uptake of RSPO products among our customers. Likewise, we hope to continue sponsoring RSPO events in North America.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.

Cargill is a member of the Human Rights, Supply Chain Traceability Working Group and sits on the Board of Governors of RSPO. Cargill and 4 other palm companies convened by Forum for the Future, an independent non-profit working with private and public organizations to solve complex sustainability challenges, under the umbrella of the Decent Rural Living Initiative. The initiative seeks to improve the protection of human and labor rights of workers in the agriculture sector. The goal is to empower rural communities by establishing cross-industry and stakeholder partnerships to address worker-centric barriers and going beyond compliance. To lead the process of certification system and standard for independent smallholders through various platforms (standing committee Smallholders, TaskForce RISS, Partnership with NGOs and other parties).

We have worked jointly with RSPO LATAM in offering capacity building spaces related to topics included in the standard and in NDPE pillars that remain a challenge for growers in LATAM. The focus of initiative was smallholders and sustainability. We have enrolled more than 58 students, among which 29 approved the course and received a diploma to certify it. We also promote the use of RSPO certified materials to our existing customers whom are either sourcing conventional materials to move to RSPO certified products. We had conducted awareness building session with customers regarding RSPO certification in bid to help them to be more aware of RSPO. In LATAM, we met with customers and farmers to explain more about RSPO scheme, its implications and benefits for all parties of the supply chain. We supported the Mexico Holistic Programme, along with part of our customers, ProForest and the Mexican Federation of Palm Oil Growers (Femexpalma). This programme is aiming, among other goals, at creating a local offer of RSPO product through providing direct support to Mexican growers in achieving the certification.

We are participating in four landscape programs in Indonesia. To increase use of sustainable practices by smallholders around our operations, we are implementing programs near our Ketapang and Hindoli plantations. In Ketapang, West Kalimantan, Cargill, IDH—The Sustainable Trade Initiative, JDE Peet's, and FORTASBI (the Indonesian Sustainable Oil Palm Smallholders Forum) are supporting independent smallholders to achieve ISPO and RSPO certification. To date, 5,519 smallholders are taking part in the landscape program covering 11,568 hectares of plantations. In the Musi Banyuasin region, 2,500 smallholders supplying Cargill's Tanjung Dalam mill participated in the Hindoli Landscape Program with the support of IDH. Activities included social mapping, land use assessment, preparation to attain RSPO and ISPO certification, trainings, and building capacity to help smallholders organize themselves into cooperatives.

In Malaysia, we are engaging Wild Asia to support a group of 569 independent smallholders and 5 small growers to be successfully certified for both RSPO and MSPO certification. We aspire to continue to increase the certified smallholder annually.

We are supporting 2 smallholders project in LATAM. In Guatemala, together with Proforest, we continued working with our supplier, Palmas del Ixcán, in the company's effort to support 110 smallholders in its supply base, many of whom are women, in adopting sustainable agricultural practices and working toward becoming RSPO certified. Proforest and Cargill are providing technical support to Palmas del Ixcán in the implementation of the action plan to close gaps identified in the RSPO pre-certification audit. In Colombia, we also are partnering with Solidaridad to launch the Intel4Value landscape program to address employment and labor gaps among palm producers and workers in the Catatumbo region of Colombia. The program aims to benefit 1,200 participants. Next year we are going to support different initiatives, especially at the level of landscape and sectoral projects in LATAM. Some of these initiatives include landscape programs in Colombia (forest4water), RSPO capacity building programs (online courses) and support for SH certification in Guatemala.
