3.3 Which year did your company begin (or expects to begin) using only RSPO-certified sustainable palm oil and palm oil products from any supply chain option in own-brand products.

2027

3.3.1 If the previous target year has not been met, please explain why.

Our aim will be to supply SG certificated raw materials and to ensure the transition of the MB RSPO certificated PO, PKO sources in our products to upgrade level on supply chain. And we began to supply most of our raw materials as RSPO SG certified. However possibility of using SG RSPO certificated PO fractions and PKO fractions still seems very difficult as there is lack of commercial alternative raw materials. We are working on alternative raw materials. Additionally due to Covid-19 pandemic there is globally sourcing problems, which also causes supply SG certified palm-based ingredients/materials. But it should be noted that, it may therefore not to focus on this products within the specified timing. So, target date will be 2025 for PL products and our branded products will follow it afterwards. Our goal is to end the transition process by 2027 at the latest.

3.4 Which year did your company begin (or expects to begin) using only RSPO-certified sustainable palm oil and palm oil products from physical supply chain options (Identity Preserved, Segregated and/or Mass Balance) in own-brand products.

2027

3.4.1 If the previous target year has not been met, please explain why.

Our aim was to complete 100% RSPO-certified sustainable palm oil and oil palm products from physical supply chains at 2022. However, we will not met the target date due to the fact that there was lack of commercial alternative raw materials. Additionally due to Covid-19 pandemic there is globally sourcing problems, which also causes supply certified palm-based ingredients/materials. So, target date will be 2025 for PL products and our branded products will follow it afterwards. Our goal is to end the transition process by 2027 at the latest.

We believe that palm oil industry plays a prominent role in employment and economic development of the region, therefore it is important to support sustainable palm oil production. Depending on that, in 2013 RSPO membership has been applied to encourage using only certified sustainable palm oil, palm kernel oil and its derivatives in our products. As a first step, our sustainable palm oil supplying policy has been established and shared with our customers, stakeholders in communication and also suppliers in 2014 to promote for using sustainable sources and play active role globally. Since 2014, we are asking our suppliers to complete a detailed assessment of their sustainability policies and implementation. CCC will ensure that its staff, suppliers and customers are kept aware of this statement and their individual responsibilities by issuing a procedure on sustainable palm oil procurement.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Our aim will be to supply SG certificated raw materials and to ensure the transition of the MB RSPO certificated PO, PKO sources in our products to upgrade level on supply chain. But possibility of using SG RSPO certificated PO fractions and PKO fractions still seems commercially very difficult, therefore this causes a deviation in the time plan. On the other hand, we have encountered economic obstacles along the way. MOQ and cost increase are the biggest factor for being unable to supply of RSPO SG certified materials. SG certified products are very expensive when they are compared with MB and increased costs in the finished product is not accepted by the customers. The availability of some physically sustainable palm fractions has also proved a challenge due to the lack of development in these supply chains. There is big pressure on the manufacturers because of globalization hence it gets more challenging for suppliers to fullfill the requirements of RSPO standards. But CCC has also experienced and learned a lots of things about RSPO and encourage all stakeholders to collaborate.

- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
- Others

Others

CCC mostly engages with its customers to encourage the use of RSPO and to help improving its customers sourcing strategy. And also CCC engages with its suppliers to promote its request for MB and SG materials.
