2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership

Total	1018.00

2.2.1 Please estimate the percentage of derivatives and fractions (reported in Question CG.2.2) derived from palm oil or from palm kernel oil. The default split for volumes is assumed to be 80% palm oil-based derivatives and 20% palm kernel oil-based derivatives.

Description	Percentage

3 TimeRound Plan

3.1 Which year did your company achieve (or expects to achieve) the RSPO supply chain certification?
2015
3.2 Which year did your company begin (or expects to begin) using RSPO-certified sustainable palm oil and palm oil products in own-brand products
2015
3.2.1 If the previous target year has not been met, please explain why.
3.3 Which year did your company begin (or expects to begin) using only RSPO-certified sustainable palm oil and palm oil products from any supply chain option in own-brand products.
2025
3.3.1 If the previous target year has not been met, please explain why.
The New York State 1,4-Dioxane limit has presented a unique circumstance where we have to balance raw material dioxane levels with cost and RSPO status. At present time, it's as if one of the parameters is negated if the other two are met. For example, if you source an RSPO certified SLES that's 1,4-Dioxane compliant, it will be at a high cost. Similarly, if you source a 1,4-Dioxane compliant SLES that's low cost, it won't be RSPO compliant. We're hoping that the raw material manufacturers continue to standardize 1,4-Dioxane reductions in their manufacturing process so that the material becomes more readily available which should help drive down the cost and allow us to meet our target date.
3.4 Which year did your company begin (or expects to begin) using only RSPO-certified sustainable palm oil and palm oil products from physical supply chain options (Identity Preserved, Segregated and/or Mass Balance) in own-brand products.
2025
3.4.1 If the previous target year has not been met, please explain why.
As previously explained, this is a moving target based upon the cost of the raw material in relation to it's 1,4-Dioxane content.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on https://rspo.org/members/shared-responsibility or email the Shared Responsibility team at sharedresponsibility@rspo.org.
