2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership

As a 100% franchised, global organization, Dunkin's supply chain is complex. In the U.S., Dunkin' franchisees purchase nearly all of their restaurant supplies from the National DCP, LLC (NDCP), a nonprofit, franchisee-owned and operated cooperative with distribution centers across the country. The NDCP is the exclusive procurement and distribution entity for Dunkin' restaurants in the United States and it sources only from suppliers approved by Inspire Brands.

2.1.1 In which markets does your company sell goods with palm oil and oil palm products?

Europe °,North America °,China,India,Malaysia,Latin America °,Rest of the World °

DL.2.0 In order to facilitate ease of reporting and transparency, RSPO members operating within the palm oil demand supply chain can now choose to report palm oil and palm oil product volumes on:

an aggregate level (as in previous ACOP reporting cycles)

2.2 Total volume of uncertified and certified palm oil, palm kernel oil and related products purchased for use in your company's own-brand products. Third-party brand products containing palm oil should be excluded.

Total volume of crude palm kernel oil (tonnes)	0.00
Total volume of palm kernel expeller (tonnes)	0.00
Total volume of crude palm oil/palm kernel oil-based derivatives and fractions (tonnes)	0.00
Total	12539.00

2.2.1 Please estimate the percentage of derivatives and fractions (reported in Question RT.2.2) derived from palm oil or from palm kernel oil. The default split for volumes is assumed to be 80% palm oil-based derivatives and 20% palm kernel oil-based derivatives.

Description	Percentage
Palm oil-based derivatives and fractions	0
Palm kernel oil-based derivatives and fractions	0

2.3 Please estimate the regional distribution of your company's uncertified and certified palm oil, palm kernel oil and related products sales (as declared in Question 2.2) in the following countries/regions.

2.5 According to the volume information you have provided in Question 2.2 and Question 2.4, your company's Certified Sustainable Palm Oil uptake is:

82.64%

2.5.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake. This may include your usage of RSPO Credits to cover gaps in certified uptake, changes due to business environment, variations due to stock positions or efforts to support independent smallholders beyond volume commitments.

We have plans in place to increase the use of mass balance within the scope of our Guidelines for Sourcing Palm Oil. In addition, all of our international markets are currently using certified palm-oil. Dunkin' has many international franchisees/countries that source their own shortening/fry oil as independent business owners, and this is not managed directly by Dunkin'. As shared in prior updates, Dunkin' has been working with its international franchisees that source shortening on their own locally to transition to RSPO certified palm oil if they have not already. We started this work in 2019 with a target of them transitioning by end of 2021 (as mentioned in prior report).

The international data collection with franchisees and their suppliers is much more complicated and takes considerable time, so we have not done the surveys as frequently as Dunkin' US. Based on this, and the international data collection cycles, our most recent data for international from our last palm survey covers volumes for 2020.

As far as the 2020 data vs. prior data reported, there were some significant changes in the regional volumes for international based on the impact of Covid on franchisee's businesses, how this impact varied regionally, and also some markets were still working in 2020 toward the objective of transitioning to RSPO certified materials where need to meet the Brand's overall objectives. The plan for our next international franchisee/supplier palm survey is early 2024 to gather data on their 2023 volumes.

2.6 Please estimate the regional distribution of your company's RSPO certified palm oil, palm kernel oil and related products (as declared in Question RT.2.4) in the following countries/regions:

Countries/Regions	Percentage
Europe	1
North America	87
Malaysia	0
Indonesia	0
China	1
India	0
Latin America	0
Africa	0
Rest of World	11

We continue to work with our franchisees, suppliers, and our partners at Rainforest Alliance and RSPO to continue progress against our palm oil commitments and targets. Like the past few years, we will be surveying and engaging with our suppliers to make sure they can enable Dunkin' to get to our 100% RSPO certified palm oil goal. Throughout this process we will be conducting risk analyses and supporting and measuring progress towards our key performance metrics. Within our verification work we utilize ArcGIS as a tool to examine palm oil mill risks. This year, we will be performing the verification again and will continue to examine palm oil mill risks in further detail with suppliers. Additionally we will be exploring feasibility of supply chain certification for the NDCP (our closed distribution model system that supplies domestic Dunkin' franchisees). We previously set this as a goal for 2020 but this effort has been delayed due to COVID-19 and the recent acquisition of Dunkin' Brands.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.
