2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership

We have two manufacturing facilities. One facility manufacturers licorice and other candies that use palm oil as an ingredient. The other facility manufacturers popcorn and other snacks that often utilize confectionary coatings as ingredients. Most of these confectionary coatings contain palm kernel oil and/or palm oil as a sub-ingredient.

2.1.1 In which markets does your company sell goods with palm oil and oil palm products?

Europe ,North America

DL.2.0 In order to facilitate ease of reporting and transparency, RSPO members operating within the palm oil demand supply chain can now choose to report palm oil and palm oil product volumes on:

an aggregate level (as in previous ACOP reporting cycles)

2.2 Total volume of uncertified and certified palm oil, palm kernel oil and related products purchased for use in your company's own-brand and third-party brand products

Total volume of palm kernel expeller (tonnes)	0.00
Total volume of crude palm oil/palm kernel oil-based derivatives and fractions (tonnes)	0.00
Total	801.25

2.2.1 Please estimate the percentage of derivatives and fractions (reported in Question CG.2.2) derived from palm oil or from palm kernel oil. The default split for volumes is assumed to be 80% palm oil-based derivatives and 20% palm kernel oil-based derivatives.

Description	Percentage
Palm oil-based derivatives and fractions	0
Palm kernel oil-based derivatives and fractions	0

2.3 Please estimate the regional distribution of your company's uncertified and certified palm oil, palm kernel oil and related products sales (as declared in Question 2.2) in the following countries/regions.

Countries/Regions	Percentage

North America	99
Malaysia	0

2.5 According to the volume information you have provided in Question 2.2 and Question 2.4, your company's certified palm oil and palm oil products uptake is:

77.68%

2.5.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake. This may include your usage of RSPO Credits to cover gaps in certified uptake, changes due to business environment, variations due to stock positions or efforts to support independent smallholders beyond volume commitments.

Overall we saw a decrease in the certified palm oil and certified palm kernel uptake in our products. This was mainly due to supply chain issues hurting availability and driving up costs of these ingredients to the point that our customers were no longer willing to purchase our products at that price point. This caused us to not use certified products in some applications where we were not making an on package claim.

2.6 Please estimate the regional sales volume distribution of your company's RSPO certified palm oil, palm kernel oil and related products (as declared in Question 2.4) in the following countries/regions:

Malaysia	0
Indonesia	0
China	0

We will continue to monitor moving forward.

3.6.3 Please explain why your company does not have such a TimeBound Plan

Some customers have specific material requirements that we are not responsible for sourcing. Supply chain shortages and associated cost increases for RSPO materials is a driving factor we are currently seeing in our market.
