The target is to increase the global uptake of Segregated or Identity Preserved CSPO by 2023. For this, the internal governance structure at METRO has been enhanced with a stronger support to focus on RSPO product certification throughout all METRO business areas and geographies. Moreover, supplier engagement within challenging markets such as India and Pakistan has been started with the support of RSPO, and also in product categories which is more challenging due to small percentage of Palm Oil or derivatives.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.

- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

METRO faced weak market demand in some geographies, such as Eastern Europe or India and Pakistan. The awareness of palm oil as such and the RSPO is very low. Also, price levels especially for food products, are very low and competitive. Hence, customers and suppliers are not always willing to invest into RSPO certified products. In other markets, we observe a negative reputation of palm oil. This leads to manufacturers switching to other (exotic) oils to substitute palm oil. We do not generally support this as this might push other environmental & social risks. We do see challenges in product categories in which palm is an ingredient in a low percentage or a derivative is present in the recipe, for example detergents. We have started conversations with our major own brand suppliers.

1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
- Others
