The reason that we have not developed a baseline is because the numbers for crop sequestration are not fixed and depend on different factors. Additionally, our current Group and operations are complex to measure based on a set baseline. We have succeeded in delivering a quality report with real data which portrays our current situation regarding GHG.

2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Sourcing is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please include details of all certified and uncertified operations using palm oil, palm kernel oil and related products, owned and/or managed by the member and/or all entities that belong to the group.

Natural Habitats Americas (NHA) buys FFB from independent smallholders and outgrowers in Ecuador. FFB is transported to our own mill or to a rented mill which is under our control (exclusive use and our staff). FFB also can be transported to subcontracted collection centers, from where FFB will be transported to the mills. In the mills, CPO is extracted from the fruit supplied. The sub product of this process, the palm kernel nuts, are transported to a subcontracted PKO mill where the PKO is extracted. Both PKO and CPO are transported to our refinery partners for the production of refined products such as RBD-CO or RBD-CK as well as others ingredients and several consumer goods. NHA exports CPO, PKO, refined products, consumer goods to our group's affiliates and customers in the USA and in Europe. In the USA we also collaborate with subcontracted facilities for the production of consumer goods.

2.1.1 In which markets do you sell goods with palm oil and palm oil-related products?

There is a region in Ecuador that has been affected by the PC. This has led the company to find new farmers in different areas of the country which has meant that we have a pipeline of new growers that we can potentially certify. Certifying of all of those farmers is a constant task that we deal every time we add new farmers as our number of certified palm oil compared to the total amount of sourced palm oil will make achieving a 100% of certified palm oil a difficult target for the company.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.
