The biofuel market is a tightly regulated market, where sustainable certification is not an option, but compulsory. Thus, in procuring our material we have to strictly adhere to the certification standards endorsed by the governments of which we operate and sell our products. Thus, the commitment above covers only materials of which certification are recognized in the markets where we operate, while other markets which products we sell to (biobased chemicals) adhere to our commitment for certification and compliance to our policies and principles for responsible sourcing. This period we are already buying 100% ISCC (International Sustainability and Carbon Certification system) certified material into our supply chain. This current certification covers our obligation to comply with the EU RED (Renewable Energy Directive) and at the same time North American compliance. Our commitment above does not only include RSPO oil, but also other sustainability certified systems. In addition, we require all of our PFAD suppliers to be RSPO members.

Following our publication of the Neste Traceability Dashboard (<https://www.neste.com/sustainability/sustainable-supply-chain/traceability-dashboard>), we have enhanced our latest 2021 suppliers transparently online with additional details of the supply chain. In the commitment of making our supply chain more transparent and sustainable, we have identified the need to work with various stakeholders to transform this supply chain. In 2022, we aim to build on our collaboration with various brands, partners, suppliers and NGOs to develop traceable and sustainable landscapes. The many aspects of these supply chain include government cooperation, independent millers and independent smallholders. For smallholders, we also have committed ourselves to cooperation projects aiming at supporting smallholders in the development of their sustainability expertise and the adoption of sustainable practices. We are, for example, engaging in a smallholder project coordinated by GAR (Golden Agri Resources) in Sawit Terampil. Through developing the sustainability and traceability of smallholders' production, we aim at enabling certification of their production.
