## 2. Palm Oil and Certified Sustainable Palm Oil Consumption

*Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.*

**2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership**

Applies Globally, Nestle SA

---

**2.1.1 In which markets does your company sell goods with palm oil and oil palm products?**

Europe °,North America °,China,India,Malaysia,Indonesia,Africa °,Latin America °,Rest of the World °

---

**DL.2.0 In order to facilitate ease of reporting and transparency, RSPO members operating within the palm oil demand supply chain can now choose to report palm oil and palm oil product volumes on:**

an aggregate level (as in previous ACOP reporting cycles)

---

**2.2 Total volume of uncertified and certified palm oil, palm kernel oil and related products purchased for use in your company's own-brand and third-party brand products**

Description	Tonnes
Total volume of crude palm oil (tonnes)	306536.00

## 5. Actions for Next Reporting Period

### 5.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

- Participation in RSPO Working Group or Task Forces
- Support Independent Smallholders (ISH)
- Contribute to the RSPO Smallholder Trainer Academy
- Financial contribution to the RSPO Smallholder Support Fund
- Direct investments in Smallholder Certification projects
- Involvement/direct investments in Jurisdictional/Landscape approach
- Direct/collective investments in conservation and restoration initiatives
- Financial contribution to support members with Remediation and Compensation (RaCP) process, direct/collective investments in conservation and restoration initiatives
- Allocating FTE to promote the production or consumption of certified sustainable oil palm products
- Specific policies and action plans by the member to promote CSPO production or consumption in the upstream or downstream supply chain, including target dates or broader policies that include such efforts
- No activities planned
- Others

#### Other

In 2023 we are working towards increasing our volume as RSPO certified, with preference for RSPO SG/IP, but to be complemented by MB or Book and Claim, we will continue progress towards 100% deforestation free supply chains and in implementing our Forest Positive Strategy and our Labor Rights Action Plan. Our work plan includes additional activities promoting sustainable palm oil production, and specifically no deforestation, no peat development, no exploitation, and smallholder inclusion in our supply chains. Examples of these activities in our work plan include:

- Global supply chain monitoring of deforestation risk with Starling satellite monitoring, which in combination with traceability to plantation, HCS assessments, and conservation initiatives will work towards our no deforestation commitment.
- Directly supporting conservation and restoration of forests and peatlands around our palm oil supply chains and launching additional initiatives to address conservation and restoration of forests in palm oil producing landscapes
- Supporting the development and use of the NDPE Implementation Reporting Framework within our supply chains.
- Working collaboratively for industry transformation via active participation in the Consumer Goods Forum's Palm Oil Working Group, and in the Palm Oil Collaboration Group.
- Expanding our work with smallholders in our supply chain to develop resilient livelihoods and produce responsible palm oil, to reach smallholders through 7 landscape initiatives in pursuit of our ambition of 100% Responsibly Sourced palm oil supply chains that are inclusive of smallholders.
- Implementing our Action Plan on Labour Rights in Palm Oil Supply Chains
- Implementing our roadmap to achieve net-zero GHG emissions by 2050, including in our palm oil supply chains.

## Shared Responsibility

*The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at [sharedresponsibility@rspo.org](mailto:sharedresponsibility@rspo.org).*

## Challenges and Support

### 1.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

#### Others

The two main challenges have been related to logistics and compliance. For logistics, the challenge has been physically getting traceable and produced sustainably palm oil in certain markets where the main supply chains come through bulk vessels which introduce additional complexity to segregation and traceable materials. To address this, we try to identify supply chains where there is greater transparency as well as focusing on initiatives to support industry transformation. For compliance, we encounter obstacles in suppliers being able to demonstrate that no deforestation & no peat development is in the supply chain, as well as to address labour issues around which there is lower awareness in the industry. To address this, we have partnered with subject matter expert organizations to develop tools and build capacity in our supply chains.

**1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?**

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
- Others

In Chiapas and Tabasco, Mexico, the Mexico Palm Oil Holistic Program is a collaborative effort from Nestlé, PepsiCo, Oleopalma, RSPO, Proforest, and Femexpalma to support the sustainable development of the Mexican palm oil sector. In 2021, the project successfully completed the second phase for four smallholder groups (136 farmers in total) to achieve RSPO certification under the milestone A of the RSPO Independent Smallholder standard, meaning up to 70% of production can be sold as RSPO independent smallholder credits. In 2022, Cargill joined the program to allow for the collaboration to deepen their existing engagement with mills and independent producers between 2022 and 2025. The lessons learned are now being shared and scaled up to impact additional mills and smallholders' associations in the region to prevent deforestation and exploitation.
