We operate edible oil processing and refining facilities in Gabon, Nigeria, Mozambique, Malaysia and the U.K.. These facilities, along with our oil palm plantations in Gabon, support our integrated palm oil supply chain.

In Nigeria, we refine crude vegetable oils and refined, bleached and deodorised palm oil and palm olein, while In Mozambique we produce Refined Bleached & Deodorized Palm Olein which is fortified with Vitamin A & D as per local govt regulations. Additionally, we produce laundry soap for local consumers by using the by-product derived from palm refining.

### 3. TimeBound Plan

#### 3.1 Which year did your company achieve (or expects to achieve) the RSPO supply chain certification or RSPO trader/distributor licence?

2011

#### 3.2 Which year did your company start (or expect to start) to source any RSPO-certified palm oil and oil palm products?

2011

##### 3.2.1 If the previous target year has not been met, please explain why.

Not applicable, wearesourcing RSPO certified products since 2011 and based on market demand.

#### 3.3 Which year did your company achieve (or expects to achieve) 100% RSPO certification of all palm product processing facilities.

2022

##### 3.3.1 If the previous target year has not been met, please explain why.

Our processing facilities in UK, Malaysia and 3 KCPs in Gabon are RSPO certified. Refinery in Gabon is currently undergoing facility upgrading, Nigeria facility which was acquired earlier is serving local market and focusing on other certification system in 2020.  
For Mozambique refineries are preparing for RSPO certification in 2023.

#### 3.4 Year expected to only source RSPO-certified palm oil and oil palm products.

2030

##### 3.4.1 If target has not been met, please explain why.

Olam group has achieved its target of RSPO certification of all its own plantations and mills as per plans. For sourcing from third party suppliers to be 100% RSPO certified, entire industry needs to be transformed to the stage where most of the consumers demand certified oil and most of the producers accordingly work towards producing certified products. As long as demand potential remains lower than certified capacity, the movement towards certified oil becoming the norm & convention would continue to need the support and push from all stakeholders. Olam remains fully committed to work towards certified palm oil becoming the market norm and will continue to extend its sustainability commitments to third- party supply chain as well through engagement with suppliers, customers, and all other stakeholders to help the industry move towards achieving RSPO's vision of full sustainability.

#### 3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why

The 100% RSPO certified sourcing target is specific and responding to different market demand. However, for our facilities which are serving African consumers, there is no demand for RSPO products and lack of supply chain actors in the region. For volume sourced on behalf of our customers in Asia, there is no demand for RSPO certified products. Regardless of its certification status, all volume we processed or sourced from third party aresubject Olam's policy and due diligence.

#### 4. Actions For Next Reporting Period

##### 4.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

- No activities planned
- Others

Other
