In prior years we have steadily increased the amount of certified palm oil that we purchase, and have also purchased credits to close the gap between our certified and uncertified supply. We are proud of the significant increase in certified palm purchased within our supply chain in 2022, and will again purchase palm oil credits to offset the remaining gap. Aside from our credit purchases, Starbucks has seen a significant increase this year in the percentage of certified palm that our suppliers purchase for use in our products, and we will continue our work to steadily increase that percentage in the years to come. To support this, we will work through updates to our internal processes, documentation and communication with our suppliers to drive a continued increase in our percentage of purchased palm oil going forward as we continue to work towards 100% RSPO-certified palm in our company-owned supply chain. Likewise we will continue to adjust our internal reporting schedule to target more timely purchase and claim of palm oil credits. Continuous improvement is very important at Starbucks and we look forward to increasing the amount of certified palm purchased in our supply chain.

Starbucks does not directly buy palm oil so we are constantly improving our communication with suppliers to ensure they are aware of our RSPO commitment and prepared to complete reporting each year. The 2022 report is the seventh time the data has been gathered through a third-party platform. We have seen improvements in accuracy year over year and will keep working with the third-party service provider and our internal Sourcing organization to make the process easier in order to achieve greater progress and transparency.
