#### 4. TimeBound Plan

##### 4.1 Which year did your company achieve (or plans to achieve) its first RSPO P&C certification?

2015

---

##### 4.2 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all its estates and mills?

2030

---

##### 4.2.1 If the previous target year for G.4.2 has not been met, please explain why

The company's management restructured its organizational objectives. Great effort has been made to keep three mills (two IP part and one MB part) and their supply base certified to this day. In addition, for the 2024 audit, we will participate by being able to process the IP and MB supply chain models dually in Latin America Agrialim S.A. With the mills of Mexico and Nicaragua. These countries have their own circumstances that have not allowed them to achieve certification previously, progress has already been made to participate as soon as possible for certification in these mills, however the remediation and compensation process has been very slow in terms of report reviews and the process of compensation concept note by reviewers and this considerably delays our progress.

---

##### 4.4 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all FFB, regardless of source?

2030

---

##### 4.4.1 If the previous target year for G.4.4 has not been met, please explain why

When there is a changing supply base, as in Mexico, it is very difficult to certify independent producers because they are free to sell their fresh fruit bunches to different mills. Likewise, in the case of Nicaragua, the country's own conditions have not allowed it. Progress has already been made to participate as soon as possible for certification in these plants, however the remediation and compensation process has been very slow in terms of reviews of reports and compensation concept note by the RSPO and this considerably delays our progress. In Costa Rica there are other independent producers that are not interested in certification or they still do not meet all the requirements of the certification standards. The Atlantic zone was affected by bud rot in its plantations.
