#### 1. Operational Profile

1.1 What are the main activities of your organisation?

Gree Energy collaborates with palm oil mills to transform palm oil mill effluent (POME) into biogas that can be then converted to electricity and also renewable natural gas that provides sources for clean heat, while also contributing to the production of clean water and organic fertilizer.

1.2 What activities has your organisation undertaken to promote sustainable palm oil, the RSPO and/or RSPO members in the reporting period?

Gree Energy forms partnerships with RSPO-certified palm oil mills to create biogas-to-energy solutions that capture methane and effectively minimize emissions in the palm oil industry by transforming their wastewater. By implementing biogas solutions, Gree Energy assists palm oil operations in substantially reducing their carbon footprint and remove water pollution. These biogas also turn these environmental liabilities into clean energy, organic fertilizers and other commodities for rural communities.

67.0%		

1.4 Did members of your organisation participate in RSPO working groups and/or taskforces in the reporting period?

No

1.5 Does your organisation have any past or on-going collaborations with public or private sector palm oil industry players to support them in their efforts to increase the production or consumption of certified sustainable palm oil (CSPO)?

1.3 What percentage of your organisation's overall activities focus on palm oil?

1.6 How is your organisation's work on palm oil funded?

Gree Energy activities are funded through a combination of sources, including private investments, grants from environmental and developmental organizations, financial institutions, and revenue from our services to develop biogas technologies for palm oil companies.

## 2. Actions for Next Reporting Period

2.1 Please outline activities that your organisation will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

Gree Energy is expanding its services to include biomethane and carbon development, building on our successful biogas-to-energy projects with palm oil food processors. Our biomethane solutions will upgrade biogas into a higher quality renewable energy source, while our carbon development services will help partners tap into the growing carbon credit markets. Gree Energy remains to empower food processors in emerging markets with sustainable solutions that mitigate environmental impact and drive economic growth and also turn these environmental liabilities into clean energy, organic fertilizers and other commodities for rural communities.
