#### 2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership

## **Shared Responsibility**

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on https://rspo.org/members/shared-responsibility or email the Shared Responsibility team at sharedresponsibility@rspo.org.

Palm oil is one of the most high-yielding and land-efficient crops on the planet. When produced sustainably, palm oil can deliver value through the entire supply chain. However, some people argue that palm oil's link to deforestation means the only option is to 'get out of palm' and find alternatives. At Mars, we think there is another way. Turning our back on palm oil would mean leaving behind the economies, communities and people whose livelihoods depend on the crop – and possibly walking toward an alternative with much worse impacts. As a crop, palm oil requires relatively fewer resources like land, water and fertilizers to cultivate. It's also up to nine times more productive than alternatives within the same growing footprint. It's a crop that can be productive for up to 30 years, which makes it attractive and beneficial for farmers to invest in to support and secure their livelihoods.

Mars believes some of the highest risks to people may appear at the farthest end of supply chains, where we typically have low or no influence, visibility, or control. The company focuses on advancing respect for human rights in our extended supply chains, in close collaboration with our suppliers, their business partners, the industry, government, and communities. Since 2017, Mars has worked with Verité and our supplier Wilmar to explore how businesses across the palm oil supply chain can better understand, address, and prevent human rights risks, with a focus on forced labor. Verité published a detailed case study of insights from this work in 2020. We funded additional work with Verité to launch a new, customized online toolkit in 2021, equipping palm oil producers across the sector with practical guidance to design and manage their own effective due diligence systems. The company is working to better understand the nature of human rights risks, including forced labor, across other supply chains we rely on as a business and to identify how we can play the most appropriate role in driving change. For example, Mars and United Plantations we have embarked on a strategic collaboration supported by Verité with a common goal of transparently improving safety and human rights gaps within their shared supply chain. Mars participated in the development of the Palm Oil Collaboration Group's (POCG) Human Rights Due Diligence (HRDD) Library of Tools, which contains a selection of publicly available tools that can support companies in the HRDD process.
