2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership

2.5 According to the volume information you have provided in Question 2.2 and Question 2.4, your company's certified palm oil and palm oil products uptake is:

19.10%

2.5.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake. This may include your usage of RSPO Credits to cover gaps in certified uptake, changes due to business environment, variations due to stock positions or efforts to support independent smallholders beyond volume commitments.

We concentrate on investing in a robust programme of direct action, focusing on ensuring compliance with our commitments to no deforestation, development of peatlands (and any depth) and zero exploitation of workers and communities at different levels of our supply chain. We met ambitious targets to improve traceability. Working with WWF, CFNA, RSPO and other NGO partners and our suppliers (all of whom are RSPO members) we continue to improve our understanding of the challenges faced.

On the other hand, we continue to make efforts in the Carbon disclosure project to optimize the relevant work every year to reduce carbon emissions, and the CDP report of 2023 shows that we have made progress and is higher than the Asia regional average of C.

In addition, in the areas of environmental impact, social responsibility, employee care, energy conservation and emission reduction, we have been making continuous efforts and improvements, and we complete and publish ESG reports (Environmental, Social and Governance Report) every year.

3. TimeBound Plan

3.1 Which year did your company achieve (or expects to achieve) the RSPO supply chain certification?
2015
3.2 Which year did your company begin (or expects to begin) using RSPO-certified sustainable palm oil and palm oil products in own-brand products
2016
3.2.1 If the previous target year has not been met, please explain why.
-
3.3 Which year did your company begin (or expects to begin) using only RSPO-certified sustainable palm oil and palm oil products from any supply chain option in own-brand products.
2030

3.3.1 If the previous target year has not been met, please explain why.

With the 2024 RSPO certificate we have expanded our range of certified products. We've added Cosmetic liquid, which was only Soap product before. In this way, we can better increase the proportion of RSPO products, better promote the vision of RSPO, and make greater contributions to sustainable work.

But for the cosmetics products in China, RSPO trademark is not officially recognized by CFDA, and cannot be used on the cosmetics label, which increases the difficulty of promotion and has no advantage in certification. Even if the product meets the certification requirements, but the RSPO trademark cannot be used on the product labeling, it will not be sufficient for the promotion of RSPO and will not have a clear competitive advantage.

Due to the expansion of this product type, the more raw materials we use from palm oil or palm kernel oil sources, the challenge of using all of these raw materials from RSPO certified sources is very great, because of the significant impact on the cost of formulations and products. In addition, it is difficult to promote RSPO certified cosmetics in the Chinese market, which has a great impact on our goal.

3.4 Which year did your company begin (or expects to begin) using only RSPO-certified sustainable palm oil and palm oil products from physical supply chain options (Identity Preserved, Segregated and/or Mass Balance) in own-brand products.

2030

3.4.1 If the previous target year has not been met, please explain why.

When we begin using RSPO-certified sustainable palm oil and palm oil products, we only use the RSPO-certified sustainable palm oil and palm oil products from physical supply chain options Segregated and/or Mass Balance) in own-brand products and third- brand products.

3.6.3 Please explain why your company does not have such a TimeBound Plan

In addition to our own branded products, we also produce third party branded products, which are generally OEM business types. In this case, formulations and production are developed according to the requirement from customer. Therefore, it is generally clear in the development stage whether RSPO certified raw materials or products are RSPO certified, and the formulation development work will be carried out according to the requirement. For customers who do not have RSPO certification requirements, there is no corresponding requirement to use RSPO certified raw materials or products. However, we will also try our best to use certified raw materials even for products that do not require RSPO certification, to better achieve our goals. But in fact, the choice of raw materials will affect the cost of formula and product costs, thus affecting the company's competitiveness and cost requirements.

- 1. We would put more efforts to extend our RSPO certified soap product market, including China, Asia Pacific and Middle East etc. Even if the customer does not have a certified product demand, we will proactively recommend the advantages of RSPO certified products to customers.
- 2. We would plan to increase the proportion of RSPO certified soap products year by year. In every global hotel group product bid, we use RSPO Soap as a list of recommended products.
- 3. We plan to increase the promotion of own brand RSPO certified soap products and increase the sales.
- 4. And, with the 2024 RSPO certificate we have expanded our range of certified products. We've added Cosmetic liquid, which was only Soap product before. In this way, we can better increase the proportion of RSPO products, better promote the vision of RSPO, and make greater contributions to sustainable work.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on https://rspo.org/members/shared-responsibility or email the Shared Responsibility team at sharedresponsibility@rspo.org.
