1. Operational Profile

1.1 What are the main activities of your organisation?

WWF Indonesia is a conservation organization. We have been engaging with sustainable palm oil practices since it was started. WWF Indonesia has been supporting sustainable palm oil practices through RSPO from the perspective of environmental aspects. Our role is to support the transformation from conventional palm oil production practices into sustainable palm oil practices with a mission to promote a deforestation-free palm oil supply chain, legality, and implementation of a traceability system. Our activities include

1. Facilitating smallholder empowerment including data collection, mapping, organizational strengthening, capacity building, and ISPO/RSPO certification or other efforts toward sustainability.
 2. Facilitating the development of policies that promote the implementation of good agricultural practices in palm oil plantations in collaboration with local and national governments.
 3. Facilitating the restoration of palm oil plantations in forest areas or high-conservation value areas, which ecological functions need to be protected.
 4. On the market and demand side we also promote and engage downstream-level companies to use and increase their CSPO product sourcing. We actively collaborate with communities and other actors to promote and campaign related to sustainable palm oil products.
-

1.2 What activities has your organisation undertaken to publicise programmes to support the RSPO, RSPO certification, the uptake of RSPO-certified sustainable palm oil and oil palm products, or to support good standing RSPO members during the reporting period?

WWF Indonesia focuses its activities and interventions on promoting sustainable production and consumption in the palm oil industry. WWF Indonesia is actively promoting sustainable production of palm oil through various programs and projects in several conservation priority landscapes across Indonesia (based on the strategic plan of WWF Indonesia). The main goal is to halt deforestation caused by palm oil supply chains. Having this target, WWF Indonesia works to create innovation and combined landscape and jurisdiction approaches by working with many stakeholders along the supply chains.

1. WWF Indonesia constantly works with independent smallholder to increase their capacity and awareness of sustainable oil palm practices to comply with RSPO Principles and Criteria in the long run. To date, WWF Indonesia works with six independent smallholder groups in Pelalawan District and Kuantan Singingi District in Riau Province, as well as in Sintang District, Kapuas Hulu District, and Melawi District in West Kalimantan Province. We are also starting to work with some smallholders in Katingan District in Central Kalimantan Province.
 2. WWF Indonesia approaches retails, brand owners as well as food services chains to move forward and commit to source CSPO for the Indonesian market. At the moment, WWF Indonesia has been discussing with several retailers about how to improve their procurement policy. WWF Indonesia's role here is to connect retailers with the RSPO-certified suppliers. For example, we conducted a workshop aligned with RSPO RT 2023 schedule to promote AFI and incentive for smallholders implementing RSPO P&C.

1.3 What percentage of your organisation's overall activities focus on palm oil?

10.0%

1.4 Did members of your organisation participate in RSPO working groups and/or taskforces during the reporting period?

Yes

1.5 Does your organisation have any collaborations with public or private sector palm oil industry players to support them in their efforts to increase the production or consumption of certified sustainable palm oil (CSPO)?

Yes

1.6 How is your organisation's work on palm oil funded?

WWF Indonesia collaborates with National Offices of WWF in other countries and also works with bilateral funding mechanisms from several development aid agencies.

WWF with other partners are trying to find other opportunities of funding to implement sustainable palm oil - including NDPE and transparency of supply chain, also in collaboration with national and local government to get recognized.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.
