2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Sourcing is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please include details of all certified and uncertified operations using palm oil, palm kernel oil and related products, owned and/or managed by the member and/or all entities that belong to the group.

Alicorp SAA has a refinery named COPSA, located in the "Predio Central" industrial park in Callao, it produces oils, edible fats, sauces, detergents, and soaps for Alicorp's own brands. COPSA primarily sources its supplies from palm oil mills, located in the central region of the peruvian jungle. Since 2019, COPSA has been RSPO (Supply Chain Certification Systems). Since then, it has processed limited quantities of RSPO CSPOs based on demand.

Industrias del Espino S.A., subsidiary of Alicorp S.A.A., has an palm oil mill named Palmawasi, a palm kernel crusher and a refinery.

Palmawasi Mill is an independent palm oil mill, since it does not have its own supply base but processes fruit from a third party. It collects FFB from Palmas del Espino S.A. states and processes it into CSPO and CSPK.

The CSPO obtained is transferred directly to the refinery, where it undergoes a refining process to obtain refined palm oil, and a fractionation process to obtain stearins and oleins. In addition, the refinery produces other special fats derived from palm oil.

The CSPK is transferred to the palm kernel crusher, where it is processed for the extraction of crude palm kernel oil (CSPKO). Once obtained, the CSPKO is sent to the refinery, where it undergoes a refining process to obtain refined palm kernel oil. Additionally, through a fractionation process, its components are separated to obtain palm kernel oleins and stearins, which are used in various industrial applications. Special fats derived from palm kernel oil are also produced in the refinery for different uses, mainly in the food industry for the production of butters and cooking fats.

2.1.1 In which markets do you sell goods with palm oil and palm oil-related products?

Latin America

DL.2.0 In order to facilitate ease of reporting and transparency, RSPO members operating within the palm oil demand supply chain can now choose to report palm oil and palm oil product volumes on:

by up to 5 individual subsidiaries. Members with more than 5 subsidiaries will be required to aggregate the volumes of remaining subsidiaries into a separate total.

S1_DL.2.1.3 Please provide additional information of this subsidiary's operations

Industrias del Espino S.A., subsidiary of Alicorp S.A.A., has an independent palm oil mill named Palmawasi, a palm kernel crusher and a refinery.

In this context, its operations cover the entire palm oil value chain, from the processing of fresh palm fruit (FFB) to the production of high value-added oils and fats. The process starts with the extraction of crude palm oil at the mills, followed by refining in specialised facilities to obtain refined palm and palm kernel oils. In addition, through fractionation and modification processes, special fats are produced for various industrial sectors, mainly the food industry, which consumes these fats and butters.

3. TimeBound Plan

3.1 Which year did your company achieve (or expects to achieve) the RSPO supply chain certification or RSPO trader/distributor licence?

2019

3.2 Which year did your company start (or expect to start) to source any RSPO-certified palm oil and oil palm products?

2021

3.2.1 If the previous target year has not been met, please explain why.

This is not the case

3.3 Which year did your company achieve (or expects to achieve) 100% RSPO certification of all palm product processing facilities.

2024

3.3.1 If the previous target year has not been met, please explain why.

All the company's facilities are certified in SCC RSPO. For the first time, Palmawasi Mill has obtained the SCC RSPO certification in 2024 because it was recognised as an independent palm oil mill, as in the past years it was certified under the P&C standard because it had its own supply base.

3.4 Year expected to only source RSPO-certified palm oil and oil palm products.

2035

3.4.1 If target has not been met, please explain why.

This is not the case, because the target is until 2035

3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why

This is not the case.

4. Actions For Next Reporting Period

2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership

Alicorp has a special governance framework for the sustainable management of agricultural raw material related to its Responsible Sourcing Policy. Additionally, it has been developing the Sustainable Palm Program in partnership with the NGO Solidaridad, which aims to promote the sustainability and productivity of the palm oil supply chain in Peru, with a special focus on small-scale independent producers. Through this program, Alicorp provides technical support for the implementation of good practices and sustainable agriculture standards to advance supply traceability and close ESG management gaps, ensuring compliance with our Responsible Sourcing Policy. At the moment, Alicorp has achieved the following:

- * More than 500 producers and technicians from oil mills have been trained in sustainability management, aligned with the RSPO standard.
- * We implemented a satellite-based information tool for traceability and deforestation monitoring.
- * The Monte Alegre Neshuya Producers Association (APROMAN) achieved eligibility for RSPO certification, becoming the first group of small-scale producers in Peru to do so.
- * The Shambillo Palm Growers Association (ASPASH) achieved RSPO membership, marking another step on the path toward certification.
- * Development of a support program to close the gaps in our palm oil supplier mills, which will be rolled out in 2025.

does not apply

3.6.3 Please explain why your company does not have such a TimeBound Plan

Because it is not planned to manufacture on behalf of other companies

4. Trademark Use

4.1 Does your company use or plan to use the RSPO Trademark in own-brand products?

No

4.3 Please explain why your company does not plan to use the RSPO Trademark in own-brand products

- ☒ Challenging reputation of palm oil
- ☐ Confusion among end-consumers
- ☐ Costs of changing labels
- ☐ Difficulty of applying for RSPO Trademark
- ☒ Lack of customer demand
- ☒ Limited label space
