6. GHG Footprint

6.1 Has your company started quantifying its GHG emissions and monitoring?

No

6.1.2 No. Please explain why your company has yet to start GHG emissions tracking and monitoring

We have not yet implemented the RSPO calculator for GHG monitoring. However, we have made significant progress in our greenhouse gas reduction strategies across our supply chain, particularly through biogas capture for electricity generation and fertigation using the liquid by-product derived from the biogas production process.

6.2.1 What is the average GHG emissions by hectare (tCO₂e/ha) for all certified management units in this reporting year?

0.0

6.2.2 What is the average GHG emissions per tonne of crude palm oil (tCO₂e/tCPO) for all certified management units in this reporting year?

0.0

6.3 What are the key emission sources identified by your company in certified management units?

- ☐ Existing cultivation peatland
- ☒ Palm oil mill effluent (POME)
- ☒ Fertiliser application
- ☐ Others

Others

-

6.4.1 Does your company have a long-term target?

No

6.4.1.2 No. Please explain why your company did not have an emissions target, and forecast how your emissions will change over the next five years?

This is primarily because we have not yet established a baseline—that is, a comprehensive assessment that identifies our current emission levels and quantifies the potential for reduction over a defined period.

6.5 Does your company have an annual GHG emissions reduction/minimising target?

No

6.5_No No, identify the reason(s) :

We have not yet implemented the RSPO calculator for GHG monitoring, nor have we established a baseline—a comprehensive assessment that identifies our current emission levels and quantifies the potential for reduction over a defined period. Consequently, there is no formal emissions reduction target in place. However, since 2020, we have been investing in technologies aimed at minimizing greenhouse gas emissions, such as the biogas capture project for electricity generation and the use of liquid by-products for fertigation within our supply chain.
