2030

4.4.1 If the previous target year for G.4.4 has not been met, please explain why

We are committed to supporting smallholders on their journey toward sustainability certifications (eg RSPO and EUDR) and sustainable good agricultural practices. We work alongside independent and plasma smallholders, setting clear targets to address land status issues, particularly where plots overlap with designated forest areas, by providing resources, technical support and certification support, ensuring inclusivity as standards evolve.

Building on this, we continue to foster inclusive partnerships across our supply chain. Our SHINES (SmallHolder Inclusion for Ethical Sourcing) programme, launched on 10 October 2024, provides customised support on new requirements like the EUDR and promotes forest conservation, helping smallholders strengthen their resilience and achieve global certifications.

6.5.3 What measures are currently being taken to reduce GHG emissions?

At REA, we are committed to reducing GHG emissions through targeted strategies across our operations. We maintain a strict No Deforestation, No Peat, No Exploitation (NDPE) policy, supported by satellite monitoring and field audits to ensure a deforestation-free supply chain. We also enforce no development on peatlands, High Conservation Value (HCV) areas, and zones with high carbon stocks.

In addition, we have set aside 18,000 hectares of conservation reserves and are actively restoring degraded areas to enhance carbon sequestration. Methane capture facilities at our mills further reduce emissions, alongside best management practices (BMPs) focused on peatland protection and HCV area management.

We complement these efforts with regular biodiversity monitoring and wildlife patrols to safeguard ecosystems that play a crucial role in carbon storage and climate resilience.

8. Actions For Next Reporting Period

8.1 Outline activities that your company will undertake in the coming year to advance its certification efforts.

REA supports independent smallholder groups through a range of initiatives focused on improving productivity, sustainability, and market access. This includes training on financial management, agronomy best practices (BMPs), and community development to strengthen smallholders' capacity and encourage participation in RSPO certification.

To further empower smallholders, we launched the SHINES (SmallHolder INclusion for Ethical Sourcing) programme, running from 2025 to 2027, in collaboration with corporate partners. The programme aims to support 600 independent smallholders in achieving EUDR compliance and RSPO certification, protect approximately 10,000 hectares of forest, and improve livelihoods in six villages. Key areas include regulatory training, forest conservation beyond our concessions, and support for income diversification, including premiums for sustainable FFB.

Through SHINES and ongoing initiatives, we work closely with independent smallholders, processors, refineries, and FMCG companies to enhance traceability, promote sustainable practices, and contribute to forest and biodiversity protection.

8.2 Outline activities that your company will undertake in the coming year to promote the uptake CSPO along the supply chain.

1. Smallholder Capacity Building:
Expand training programmes for independent and plasma smallholders on good agricultural practices, traceability, and regulatory compliance (including RSPO and EUDR standards), supporting their journey towards CSPO certification.

2. SHINES Programme Implementation:
Roll out targeted activities under the SHINES (SmallHolder INclusion for Ethical Sourcing) programme, aimed at bringing 600 independent smallholders toward RSPO certification and enhancing traceability and sustainability across approximately 10,000 hectares.

3. Stakeholder Engagement:
Strengthen collaboration with FFB suppliers, processors, refineries, and downstream buyers to increase market demand and awareness for CSPO, ensuring alignment with global sustainability commitments.
