Making regular engagements and communication with palm oil users and buyers on the impact of RSPO physical and credits have to increase smallholder livelihoods and smallholder inclusion in the global palm oil market. WAGS is also using an integrated approach to combine the support for sustainable production by independent small producers and increasing the market uptake for sustainable production through the alignment of our SPIRAL business partners.

Efforts are also being made to establish strategic partnerships with mill partners to directly increase the uptake of certified FFB - to enable more traceable and transparent sourcing within the supply chain, while also encouraging mills to co-invest in the certification process.

Promotion of best management practices and encouraging the implementation of more natural and chemical-free methods through WAGS BIO-Intensive programme which results in reduction of chemicals, usage of organic waste, improve soil biodiversity and soil health, increase yield and reduction of operation cost. This is also an interest to corporate buyers who are looking for initiatives beyond certification, to support real on-the-ground solutions among independent smallholders.

We are also working with various technical partners to explore new initiatives to bring more value to smallholders such as implementing a carbon removal project and explore opportunities for a carbon certification scheme for smallholders that also gives them an economic incentive for carbon farming. This would encourage them to support independent small producers more, reducing the perception that small producers are 'the problem', but in reality, are 'the solution'.

Wild Asia's approach is to work with independent dealers and collection centres who are not aware of RSPO and bringing them into the certification process. We are currently trialling a blockchain traceability app to improve supply chain traceability between mills and their suppliers. We see them as an important link to reach independent small producers.

We are also one of the few working directly with independent small growers (above 50 ha) and certifying them under a group scheme which reduces the cost of certification, adding value to them. We also work with independent mills, providing solutions for their external suppliers to get certified. Wild Asia also works together with government agencies such as MPOB and JAKOA (Department of Orang Asli Affairs) to support smallholders under their networks to get RSPO-certified.
