Others

Using CSPO requires additional costs to be incorporated in relatively cheap and basic product of soap bar. Encouraging customers to join and share premiums is difficult and is a real obstacle in increasing the number of products produced based on CSPO. On one hand - there is still not enough awareness of the importance of RSPO among some markets/customers, on the other hand - palm oil still has bad press and clients are skeptical about RSPO. Therefore there are difficulties to convince some business customers to use CSPO in the products and cover extra costs.

7.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
