5. Actions for Next Reporting Period

5.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

Remia will continue to promote certified sustainable palm oil or palm products among customers. Sustainability issues are not only discussed internally but also with all vegetable oil suppliers and consumers of products that contain vegetable oils. Customers are offered the option to buy Remia's end products as RSPO certified products. As Remia has been certified for the supply chain models SG and MB, these are the two options that can be chosen out of the product range that is offered. Although it is very important to keep our direct customers well informed about the progress that has been made on sustainability targets, it might be even more important that end consumers are aware that their buying behaviour can make a difference. Their knowledge about the adverse consequences of large scale palm oil productions should be improved. Once the end consumer is aware of these problems and prepared to pay extra for products that contain sustainable palm oil, the sustainability transformation will accelerate. The role of the Government seems to be crucial in this respect.

6. Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil (RSPO) approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility indicators will be done through several channels, including ACOP. As the implementation of Shared Responsibility reporting is still on-going and in development, the Shared Responsibility section in ACOP is not yet final and may change in future ACOP cycles. For more information on Shared Responsibility, please go to <https://rspo.org/news-and-events/news/what-are-the-new-shared-responsibility-rules> or email the ACOP team at acop@rspo.org
