Total	0.0	0.0	0.0

2.4 According to the volume information you have provided in Question PT.2.2 and Question PT.2.3, your company's certified palm oil and palm oil products uptake is:

0.00%

3. TimeBound Plan

3.1 Which year did your company achieve/obtain (or expects to achieve/obtain) the RSPO supply chain certification or RSPO trader/distributor licence?

2025

3.2 Which year did your company start (or expect to start) to source any RSPO-certified palm oil and oil palm products?

2024

3.2.1 If the previous target year for PT.3.2 has not been met, please explain why.

Limitation in pricing and supply for RSPO certified material.

3.3 Which year did your company achieve (or expects to achieve) 100% RSPO certification of all palm product processing facilities.

2028

3.3.1 If the previous target year for PT.3.3 has not been met, please explain why.

That will involved with the supply mostly, because we are processor of palm oil if there is limited supply on the certified palm oil we as the processor might not be able to achieve to planning that we planned ahead. In addition, the pricing will become a major issue as well because of the heavy competition in this industry might force us to select the reasonable cost of raw material for our process.

3.4 Which year did your company begin (or expects to begin) sourcing only 100% RSPO-certified palm oil and oil palm products.

2030

3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member sells goods with palm oil or palm oil products, please explain why

we will only make our sells domestically.

3.6 How does your company proactively promote RSPO and RSPO-certified sustainable palm oil and oil palm products to your customers?

We did communicate with our customers from time to time about the necessity of certifying RSPO standard, it is up to the buyer and seller to come up with some agreement on the pricing policy. Though, we should consider RSPO standard as a guideline for sustainable method but for country like Thailand most oil palm grower will look for premium pricing if they have to acquire this standard. Anyway, it is not up to us as a processor to consider the new pricing with RSPO certified product, it will depend on the end user as well. The end users will have to comit and returning something in return to the oil plam grower in any form because the oil palm growers will have to spend time and money in order to achieve the RSPO standard, if we only to discuss about sustainability most oil plam grower in this country still very poor so adding more work and cost to them more or less will be a burden to them. So if we have to promote this RSPO standard we will have to convince them in such a way that they feel like they are having more benefits in every way.

4. Actions For Next Reporting Period

4.1 Please outline activities that your company will take in the coming year to promote the production or consumption of certified sustainable palm oil (CSPO)

- Acquire more rspo certified material in order to start up the process. - Discuss with buyers or end users about the possibility for premium pricing with will return to the oil plam grower. - Meet up with the farmers to promote the idea of acquiring rspo standard and explain to them how importance it is to the plam oil business worldwide.

5. Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil (RSPO) approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility indicators will be done through several channels, including ACOP. As the implementation of Shared Responsibility reporting is still on-going and in development, the Shared Responsibility section in ACOP is not yet final and may change in future ACOP cycles. For more information on Shared Responsibility, please go to <https://rspo.org/news-and-events/news/what-are-the-new-shared-responsibility-rules> or email the ACOP team at acop@rspo.org
