The ever changing RSPO guidelines themselves. We have dozens of emails over the years with Palm Trace and RSPO as to what category we should even be listed under, as we are simply a distributor who re-packages from one container into another. Some RSPO employees have told us we are a distributor category but others have said Trader Processor, and as a result have had to have our license suspended and then renewed multiple times because of the uncertainty within your own organization on this There is no category for what we and others like us do so we have to be lumped into the Trader / Processor category with the vast majority of the questions not having anything to do with our relationship to the Palm oil arena. You simply need to have TWO distributor categories: 1) those who take possession of a product and do not re-package it 2) those that take possession of a product and re-package it In tins way we can be removed from the Trader / Processor category as 90% of the questions asked have zero application to us.

6.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Engagement with government agencies
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
