## 7. Challenges

### 7.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

An effort to eliminate pollutants and transparent communication of nutritional attributes / sustainability issues by the palm oil processing industry would be necessary. Palm oil and its derivatives are systematically attacked either for its unhealthy nutritional profile and its connection to chronic diseases or due to unsustainable producing practices. These have created the general opinion that all palm fat is "bad". RSPO helps to some extent but it is extremely complicated (and expensive) to fight back this overall settled opinion. Therefore retailers tend to remove palm oil and derivatives from their formulations whenever it is technically feasible. Finally, some doubts on transparency over several certification schemes seem to be considered among lawmakers, opinion leaders and is reaching general public opinion. RSPO scheme must clarify this issues and provide a clear message to consumers

### 7.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
- Others

Others

Our suppliers of raw material and B2B finished products containing palm oil and derivatives were already engaged to join RSPO and certify their production for GBFOODS. We provided occasional technical support and we have addressed them to our certification entity.
