**3.2.1 If the previous target year for CG.3.2 has not been met, please explain why.**

-

---

**3.3 Which year did your company begin (or expects to begin) using 100% RSPO-certified sustainable palm oil and palm oil products from any supply chain option in own-brand products.**

2025

---

**3.3.1 If the previous target year for CG.3.3 has not been met, please explain why.**

For our natural and organic cosmetic products we have achieved 100% RSPO certified raw materials. Anyhow, for our pharmaceutical products this is still a challenge. Pharmaceutical raw materials (based on palm derivatives or fractions) are still not offered in certified quality on the market. Our approach is, to compensate these volumes with independent smallholder certificates.

**3.4 Which year did your company begin (or expects to begin) using 100% RSPO-certified sustainable palm oil and palm oil products from physical supply chain options (Identity Preserved, Segregated and/or Mass Balance) in own-brand products.**

2025

**3.4.1 If the previous target year for CG.3.4 has not been met, please explain why.**

#### 4. Trademark Use

##### 4.1 Does your company use or plan to use the RSPO Trademark in own-brand products?

No

---

##### 4.3 Please explain why your company does not plan to use the RSPO Trademark in own-brand products

- Challenging reputation of palm oil
- Confusion among end-consumers
- Costs of changing labels
- Difficulty of applying for RSPO Trademark
- Lack of customer demand
- Limited label space
- Low consumer awareness
- Low usage of palm oil
- Risk of supply disruption
- Others

Others

Palm is just one of several critical raw materials. Using labels for all of them would not be possible.

## 7. Challenges

### 7.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

Our main challenge is the market of derivatives. First the lack of traceability, but as well the availability of at least MB certification - especially for pharmaceutical raw materials. Furthermore the pharmaceutical sector is still not resolved. Any raw materials in pharmaceutical Quality containing any Palm based derivatives are still not available in RSPO-certified grade. With that it is big challenge for us to reach 100% without B&C.

### 7.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
